

The Chatham Health District oversees the permitting and inspection of over 300 food establishments within the towns of East Hampton, East Haddam, Hebron, Marlborough, Haddam, Portland and Colchester. These establishments include restaurants, bakeries, delis, school cafeterias, grocery stores, meat markets, itinerant vendors and caterers. Our goal is to ensure compliance with the Public Health Code. In doing so we are able to prevent disease and insure a healthy and safe environment for our residents. The Chatham Health District will be using the following food establishment rating system to provide the public with information about the safety and cleanliness of each food establishment and their food handling practices at the time of the inspection. The ratings will be posted on our web site and updated monthly.
