Memo 02-2

To: Chatham Health District Staff
From: Thad D. King, Director of Health
Re: Onsite Septic System Using Select Fill Material
Date: 10/1/02

All septic system designs using select fill material shall conform to the standards of the Public Health Code, most recent revision, and be demonstrated as suitable by the following:

1. The installer shall provide a sieve analysis of the material as provided by the supplier, if the material is of known quality and performance, and has been tested with regular frequency, and if the last test results were completed not more than two months from the fill placement/area preparation inspection date, and those test results shall be part of the final inspection approval.
2. The installer shall provide a sieve analysis of the material after placement onsite pursuant to the approved plan and prior to construction and those test results shall be part of the final inspection approval.
